PROFILE

A Full-Stack Web Developer who enjoys solving complex problems and turns them into simple and beautiful interface designs. I love the logic and structure of coding and always have strived to write elegant and efficient code, whether it be HTML, CSS, or JavaScript.

I am currently enrolled as a full-time student at Grand Canyon University on a path to pursue my BS in Software Development. At the same time, I have been learning web development technologies through Careerfoundry Boot camp.

EMPLOYMENT HISTORY

Associate SEO Specialist at NPAccel, Remote
September 2021 — Present

• Assist with conducting technical audits on client websites.

• Implement technical recommendations.

• Optimize images, implement structured data, fix 404 errors

• Use WordPress, Shopify, and other CMS platforms to optimize websites.

Information Technology Technician at Asurion, Phoenix
January 2018 — June 2018

• Interned and acquired personal training for reaching out as a technical support service to Verizon Wireless customers.

• Obtained Associates of technology through the program and skills that involves effective communication and solving technical issues for most of the tech associated Smartphones, Tablets, Computers, and device replacements through insurance and warranty programs.

• Certified with perfect attendance and associates of technology for acquiring skills and abilities in solving technical issues for Verizon Wireless Customers.

EDUCATION

BS in Software Development, Grand Canyon University, Phoenix
January 2018 — April 2022

• Learned Software Development using Java, C#, and PHP on frameworks such as Spring, ASP.NET, and Laravel.
• Worked on documenting and designing the architecture of applications. UML diagrams, ER diagrams, Wireframes, Flowcharts, and Sitemaps were a part of the documentation process.
• Worked with mobile and web technologies, project management tools, cloud platforms, and web application security to protect important information and maintain information security.

Web Development, Careerfoundry, Online
May 2021 — December 2021

• Learning technologies to design user interactions on websites, developing servers, and databases for website functionality, and coding for mobile platforms.
• Designing and developing APIs and working with both Relational and Non-Relational Databases.
• Learning to evaluate code to ensure it meets industry standards, is valid, is properly structured, and is compatible with web browsers, devices, and operating systems.
